

Specification Amendments

Please add the following paragraph on page 5, line 11, before the final paragraph of the summary begins:

In accordance with another aspect of the invention, a grip device comprises at least two opposable digits. A drive linkage is included and configured to enable the two opposable digits to grip. Digit tip pads are attached to the end of each of the digits and the digit tip pads are configured to rotatably contact an object when the tip pad comes in contact with the object to allow the grip to more easily hold gripped objects.
